

Smoking Cessation Service Implementation

Steve King – MLCSU Implementation Team

Myra Battle – Community Pharmacy Suffolk

Lauren Seamons – Community Pharmacy Norfolk

Lisa Lovell – Community Pharmacy Essex

Jessica Hulbert – West Suffolk NHS Foundation Trust

Rebecca Beesley – EMIS Health

Agenda

- SCS Introduction & why the service is important *c.15 mins*
- Using PharmOutcomes for SCS *c.15 mins*
- Experiences & Learning at West Suffolk Hospitals NHS FT *c.10 mins*
- Go live info *c.5 mins*
- Q&A *c.10 mins*
- Closing remarks *c.5 mins*

Background (1)

- NHS Long Term Plan (LTP): commitments
 - Prevention is a core component of the NHS Long Term Plan (LTP). The LTP commitments that set out the NHS's contribution to tackling tobacco dependence include:
 - By 2023/24 all people admitted to hospital who smoke will be offered NHS-funded tobacco treatment services
 - Acute, Maternity and Mental Health services
- The commitments are designed to:
 - Be the NHS's contribution to helping deliver a smokefree generation
 - Build on the good work already being delivered and to compliment current Stop Smoking Services
 - Focus on both physical and mental health services
 - Introduce a level of national direction, but with local development and delivery

Background (2)

- Smoking cessation programmes already exist in community settings but are variable in their involvement of pharmacy
- Hospitals are adopting the Ottawa Model of Smoking Cessation (OMSC), which:
 - Will be adopted throughout England (NHS Long Term Plan, 2019) – led by the NHSE/I Prevention team
 - Is a 12-week programme
 - Requires follow-up smoking cessation treatment after discharge from hospital
 - Increased 1-year quit rates by 11% (Mullen, 2010)
 - Is expected to save the NHS £85m within 1 year (Royal College of Physicians, 2018)

Background (3)

The aim of the NHS Smoking Cessation Service (SCS) is:

To support delivery of the prevention ambitions in the NHS LTP, and for community pharmacy to become a nationally available choice for patients to access smoking cessation support post discharge.

Background (3)

Why the service is important!

Core20: Above-average smoking rates among the most deprived reduces their healthy life expectancy and increases pressure on the NHS

In England a third of all smokers live in the most deprived two deciles.¹ In NHS Suffolk and North East Essex ICB there are 121,900 smokers and 25% of people in routine and manual occupations smoke. Smoking costs your ICB £40.2m a year.²

Annually in your ICB smoking causes:

- 9,348 hospital admissions.³
- 1,392 premature deaths.⁴

Additional impact on communities in your ICB:

- 47,776 smoking households live in poverty.⁵
- 3,353 people out of work due to smoking.⁶
- 24,702 people receive informal care from friends and family because of smoking.⁷

PLUS: The most deprived groups have the highest smoking rates

National smoking rates among:

- People who are homeless (77%).⁸
- People entering prison (80%).⁹
- 11–16-year-olds with a mental disorder (22%).¹⁰
- People in social housing (26%).¹¹

Smoking rates for those receiving addiction treatment in your ICB:

- Those receiving treatment for opioid addiction (75%).¹²
- Those receiving treatment for alcohol addiction (50%).¹³

5: Five clinical areas of focus are all impacted by smoking

1. Maternity	2. Severe Mental Illness	3. Chronic respiratory illness	4. Early cancer diagnosis	5. Hypertension
<p>Smoking is the leading modifiable risk factor for poor birth outcomes.</p> <p>In your ICB 9%¹⁴ of women smoke at time of delivery, 870 women annually.¹⁵</p> <p>Find out more</p>	<p>Smoking is the leading cause of the 10-20 year reduction in life expectancy for people with serious mental illness (SMI).</p> <p>In your ICB 39% of people with SMI smoke.¹⁶</p> <p>Find out more</p>	<p>Around 86% of all chronic obstructive pulmonary disease (COPD) deaths are caused by smoking.</p> <p>In your ICB 413 people a year die from COPD.¹⁷</p> <p>Find out more</p>	<p>Smoking is the leading preventable cause of cancer responsible for 27% of cancer deaths.</p> <p>In your ICB 624 people a year die from cancer caused by smoking.¹⁸</p> <p>Find out more</p>	<p>Smoking cessation is embedded in NICE guidelines on hypertension because smokers' CVD risk is double that of non-smokers. Nationally 9,300 people a year die from CVD caused by smoking.¹⁹</p> <p>Find out more</p>

Each year we estimate that smoking costs NHS Suffolk and North East Essex ICB :

£290.9M

These costs are accrued in these areas

In NHS Suffolk and North East Essex ICB :

13.7% of adults smoke² which is about **122,000** people^{1, 2}

An estimated **£299.0M** is spent on tobacco annually (legal and illicit)¹⁷ based on an average annual spend of **£2,451** on tobacco per person

Revenue from cigarette and hand-rolled tobacco taxation only brings in about¹⁶

£194.0M

PRODUCTIVITY LOSS^{5 to 9}

£217.2M

HEALTHCARE^{3, 4}

£40.2M

SOCIAL CARE^{10, 11}

£27.3M

FIRES^{12 to 15}

£6.2M

IMPACT OF SMOKING ON PRODUCTIVITY^{5 to 9}

Smoking negatively affects earnings and employment prospects. The cumulative impact of these effects amounts to productivity losses of:

£217.2M

SOCIAL CARE COSTS DUE TO SMOKING^{10, 11}

Many current / former smokers require care in later life as a result of smoking-related illnesses. The estimated costs to the local authority/ies is: **£27.3M**

Smoking-related ill-health means social care is being provided informally by friends and family for:

25,000 people

Smoking-related ill-health causes unmet care need for a further:

10,000 people

If these were both replaced with formal paid care, it would cost the social care system an additional:

£317.4M

HEALTHCARE COSTS DUE TO SMOKING^{3, 4}

These costs are a result of smoking-related hospital admissions and the cost of treating smoking-related illness via primary care services.

£40.2M

FIRE COSTS DUE TO SMOKING^{12 to 15}

As fires are relatively rare, the fire-related costs of smoking are not estimated for smaller geographies.

£6.2M

About **39** smoking related fires are attended by Fire and Rescue Services each year.

Smoking Cessation Transfer of Care Pilots

- A pilot service was introduced in October 2020 with the first location being referrals from Royal Oldham Hospital to pharmacies in the Oldham area
- Pharmacies were selected following an Expression of Interest process, to give good geographical coverage and extended opening hours
- A second pilot area went live in November 2021 in the Lambeth and Southwark boroughs of London, working with Guys and St Thomas' Hospital and King's College Hospital
- The pilots have now transitioned into the Smoking Cessation Service (SCS)

Pilot Data Overview: Oct 2020 to Dec 2021

Transitioning the pilot into the SCS

- Standard Treatment Programme (STP) developed with National Centre for Smoking Cessation and Training (NCSCT)
- Service funding agreed (PSNC & NHSE)
 - **Consultation fees – Community Pharmacy Contractual Framework (CPCF)**
 - **NRT costs to be recharged back to the ICB**
- NHS Smoking Cessation Service (SCS) specification agreed
- Service launched to align with National No-Smoking Day (10 March 2022)
 - Registrations opened on 1 March 2022
 - **Intentional ‘soft launch’**

National Implementation of SCS

The role of the CSU's

- Mapping
 - Understand the position of each Acute Trust in terms of their delivery of the relevant parts of the LTP
 - Inform planning
 - Identify key stakeholders to support working groups
- Facilitate implementation at local level
 - Advisor available for each region
 - Ensure pilot sites transition successfully
 - Engage with early implementers and those sites looking to start delivery imminently
- Production of supporting documents

3 stage process to Go-Live

Stage 1:

Scoping & Mapping

Initial engagement and establishment of working group(s).

To include Public Health, LPC, Acute Trust, ?Locally Commissioned Service

Stage 2:

Pathway agreement

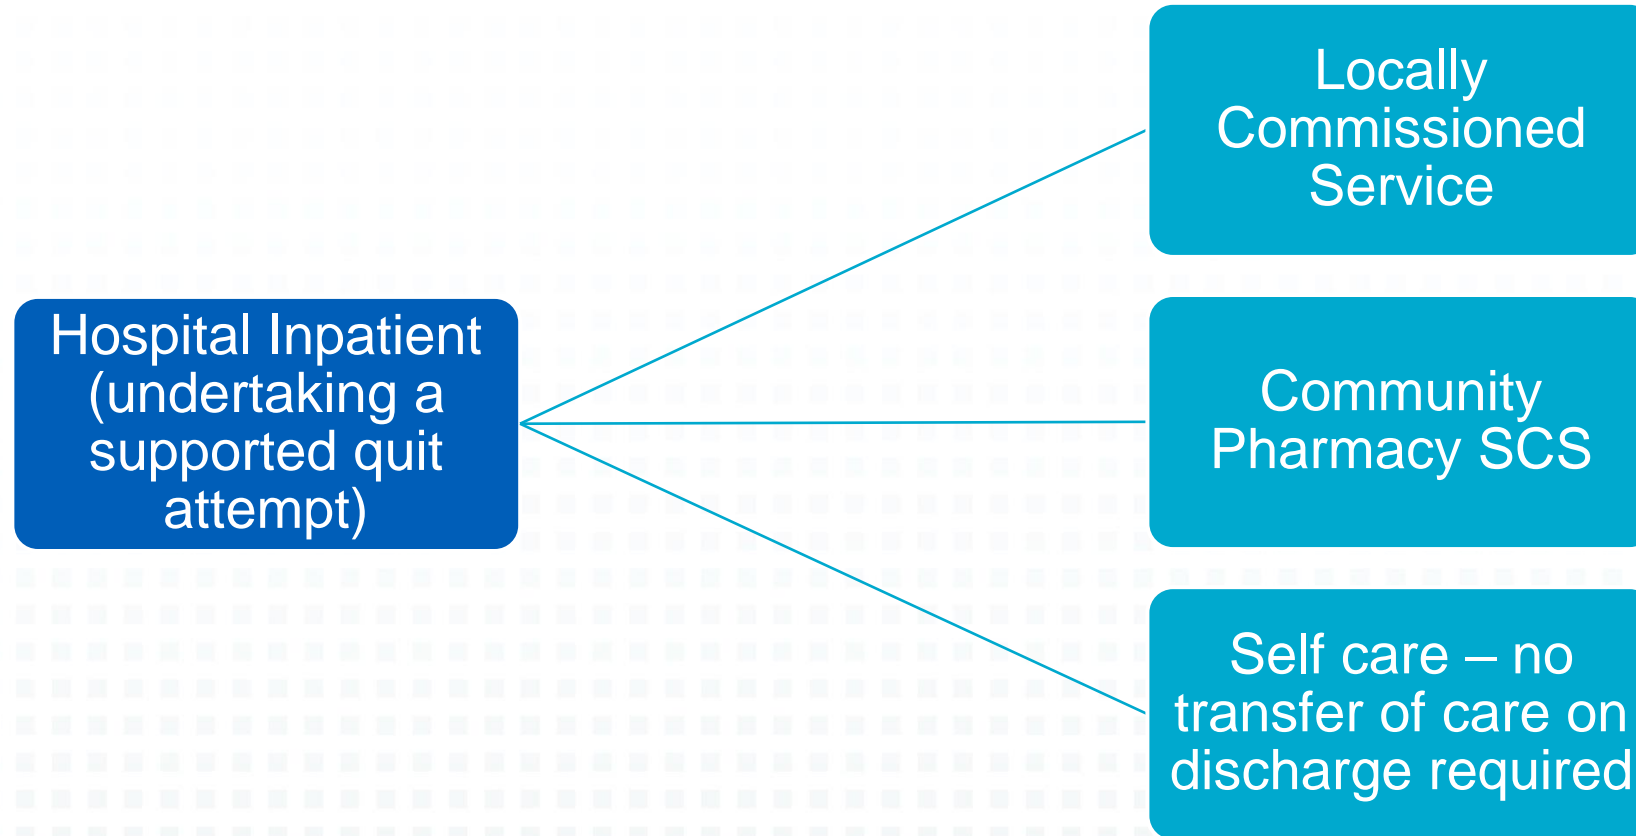

Agree the pathway and the method of sending a digital referral.

Stage 3:

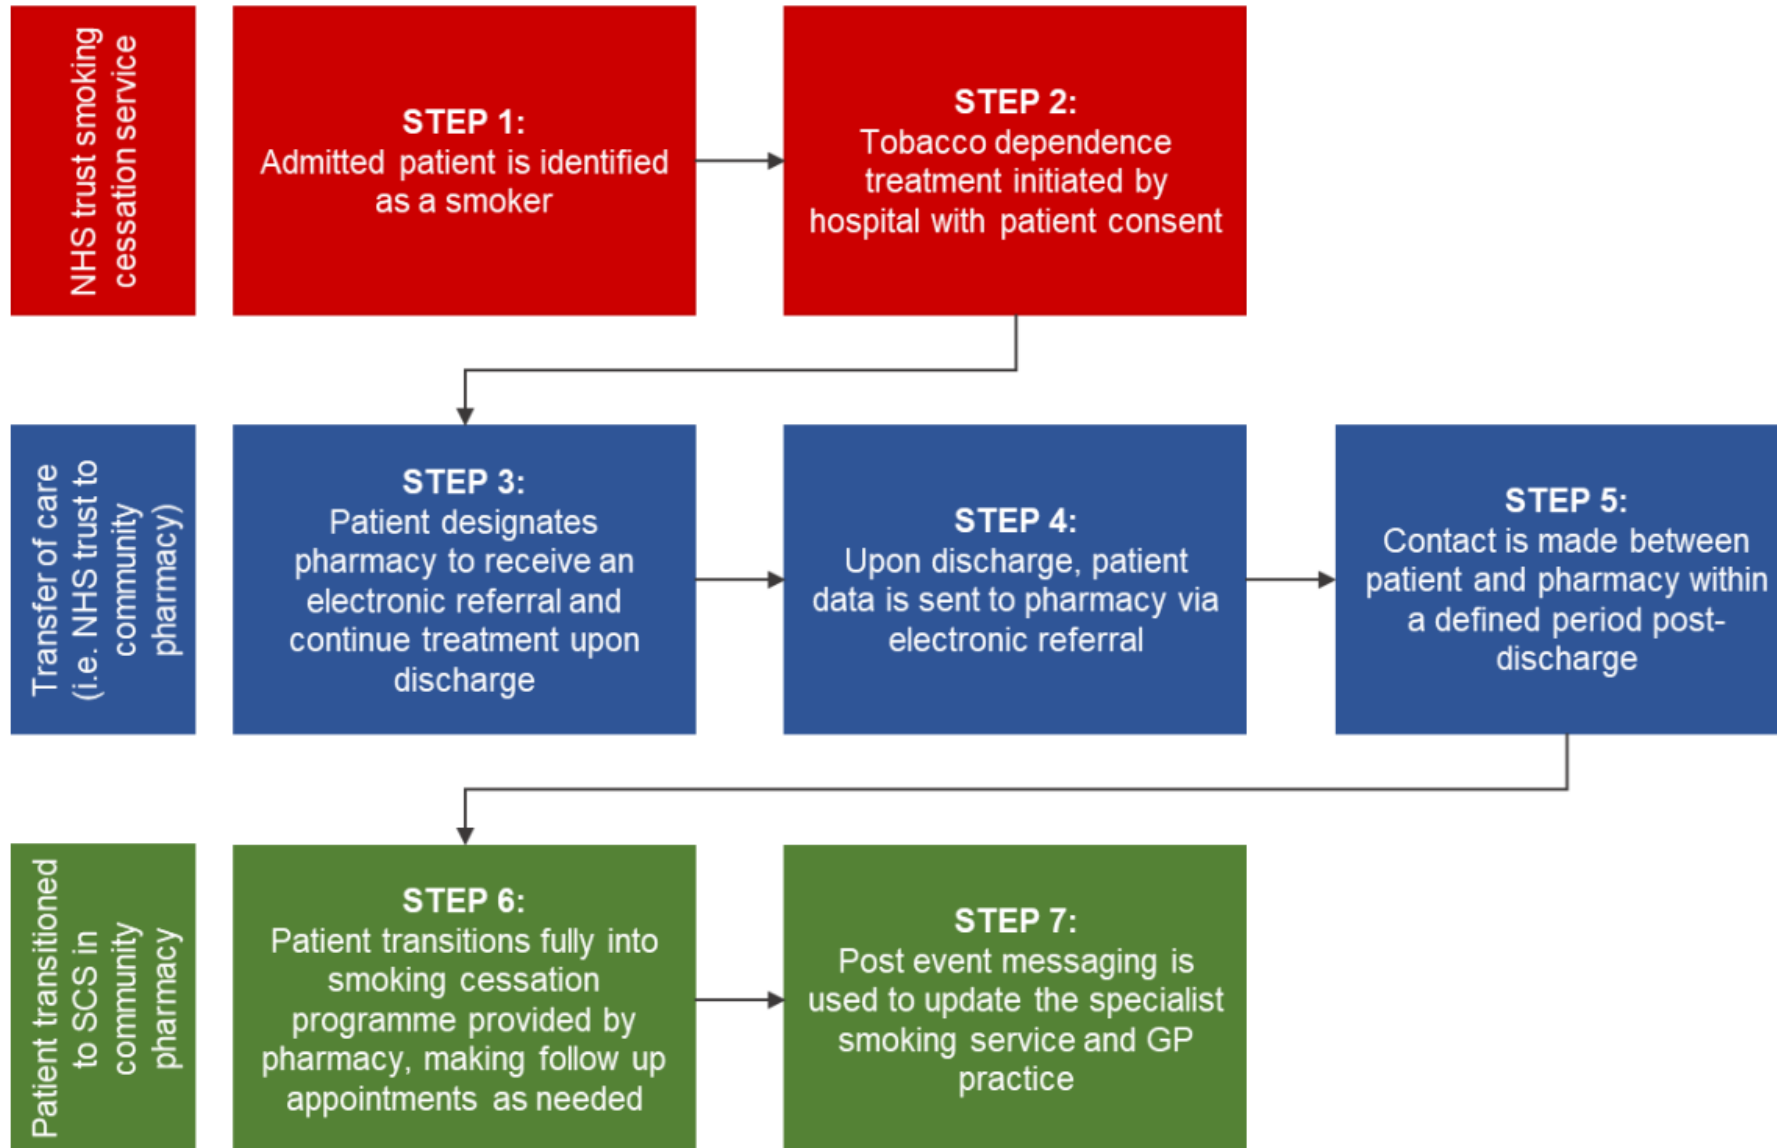

Community pharmacy engagement

LPCs can confidently recruit community pharmacy support.

Pathway

NHS SCS Model of care

NHS SCS overview for community pharmacy (1)

- Intended to **compliment existing** locally commissioned stop smoking services
- Can **only see patients** in the SCS who have been **referred from the NHS Acute Trust** and who wish to initiate / continue a quit attempt post discharge
- Patient **contact within 5 days** of referral, at least **3 attempts** to make contact, if no contact then must inform the referring Trust
- Pharmacies will provide support up to **12 weeks**
- Consultations (no more than 2 weeks apart) can be delivered **face to face or remotely**, with NRT supply (max 2 weeks at a time) from **agreed** list of GSL products in Drug Tariff

NHS SCS overview for community pharmacy (2)

- **Clinical record** to be made of all service activity
- **CO monitoring** for face to face consultations
- **No charges to patients**, even if they pay for prescriptions
- Patient level outcome **data required to be returned** to the referring NHS Acute Trust & patient's GP
- Fees: **£1000** set-up fee and then **£30** initial consultation, **£10** interim consultations, **£40** last consultation (which can be any time from week 4 to week 12) – submit claims on **NHSBSA MYS**

NHS SCS training

- The National Centre of Smoking Cessation Treatment (NCSCT) Stop Smoking Practitioner Certification (practitioners that are already certified do not need to repeat their training for the purposes of this service)
- Specialist NCSCT modules to support treatment for people with a mental health condition and pregnant women (these must be completed after the NCSCT Practitioner training has been successfully completed)
- NCSCT module on using e-cigarettes
- Practitioners must have read the NCSCT Standard Treatment Programme (STP), which will be used to support consultations
- Also need CO monitor and SOP in place to sign up on BSA

Overview and demonstration of PharmOutcomes for trusts and pharmacies

Rebecca Beesley – EMIS Health

Delivering tobacco dependence treatment and support: pharmacy hospital discharge pathway

Jessica Hulbert, public health manager

Tobacco dependence service

- The NHS Long Term Plan states that by March 2024, all patients admitted to hospital who smoke should be offered treatment and support to help them quit
- Patients who smoke are referred to the tobacco dependence team (TDT)
- The TDT aim to see the patients on the wards within 24 hours of admission
- Patients are given motivational support and advice to help them quit
- Nicotine replacement therapy is prescribed, and two weeks supply is expected with the TTO's.
- On discharge patients are referred to stop smoking services in the community for continued support.

Timeline of referrals to community pharmacy

Date	Event
2022	Understanding pharmacy pathway and establishing HL7 message option in the electronic patient record (EPR) – not live yet
January-March 2023	Planning referral pathways to pharmacy and establishing relationships
April 2023	Start referrals to community pharmacy using NHS.net email – small numbers
October 2023	Start referral through Pharmoutcomes
December 2023	Over 100 referrals to community pharmacies since April 2023 33 confirmed quits.

Case study – respiratory female patient in her late 70's with COPD

- Patients' home life is very complex.
- The patient had tried to stop smoking several times but was always unsuccessful.
- The patient was visited by the TDT on the cardiac ward and was prescribed NRT and given motivational support.
- She decided to stop smoking for herself and her family
- She went to a local pharmacy for continued support and NRT
- The patient is a confirmed CO validated quit at 4 weeks

“I want to live for myself, I can't afford to die as there will be no one to look after my family”
(patient)

“I'm so glad that I met you and the pharmacist, it came at just the right time for me, thank you”
(patient)

Top tips

- Allow plenty of time to develop and establish services
- Build strong relationships with your local pharmacy network/committee e.g., Community Pharmacy Suffolk
- Get to know the local pharmacies and keep in regular touch with open communication channels
- Establish good referral pathway(s)
 - Pharmoutcomes
 - NHS.net
 - HL7 message direct from EPR
- Be clear about other local pharmacy smoking cessation pathways

Thank you for listening
